CAPTIV

The CAPTIV positioning bar helps orient the carabiner to load the major axis, limits the risk of rotation, and keeps it integrated with the device or lanyard. The CAPTIV is compatible with OK, Am'D, Am'D PIN-LOCK, WILLIAM, OXAN, VULCAN, Bm'D carabiners and the ROLLCLIP A pulley carabiner.

When used with the I'D descender, the CAPTIV positioning bar limits the risk of carabiner rotation and keeps it integrated with the device.

When progressing with an ABSORBICA lanyard, the CAPTIV positioning bar integrates the carabiner with the device to limit the risk of losing it and helps orient the carabiner to load the major axis.

Short Description	Connector positioning bar
-------------------	---------------------------
